3CX softphone configuration guide for PC

This manual explains how to configure 3CXphone softphone for PC and connect it to Netelip service to make and receive calls.

Step 1

Sign up at www.netelip.com

By registering you will receive an email with your SIP account data (username, password and server) or your vPBX extension data.

Step 2

Download free 3CX softphone on your computer from the following link http:// www.3cx.es/voiptelefono/index.html. Save and run the file to install it on your PC.

Step 3

Once installed, open it and click on the top side to enter the section "Account". Create a new one for **netelip** just clicking on "New".
